SANITARY WARE SPECIFICATION SHEET

Genie hand shower boosts water pressure using a simple principle: water passing through a narrow, tapering channel will always be faster than through a straight, wide one.

GENIE

MORE PLEASURE.
WHATEVER THE PRESSURE.

- When you cover part of a garden hose nozzle with your finger, water builds up pressure and exits faster. Genie works on the same principle.
- First, the tapered design at the internal water channel becomes >77% narrower before the water reaches the shower face.
- The water pressure is significantly boosted as it exits the shower face via 120 micro spray holes - that taper by 63% over a short depth - with a greater force and speed.

American Standard

FEATURES

- Enhanced water pressure for a full, robust shower experience that's gentle on your skin.
- Transparent face plate allows consumers to know if nozzles are blocked.
- Easy to open back cover to wipe off any dirt and/or grime build up.
- Maintenance key included to open back cover.
- Integrated design through dual injection production technique.

SPECIFICATIONS

- With 2.5 GPM Neoperl regulator:
 - 0.10MPa, 4.2 L/min ≤ Q ≤ 8L/min
 - 0.30MPa, Q ≤ 9L/min
- Temperature drop: less than 3°C.
- Under 0.1Mpa, height of spray spouting vertically ≥ 280mm
- Flow at low pressure: Under 0.05Mpa, flow rate ≥ 4.0L/Min
