Underbasin TMV Ref # 07200069 This high quality, lead-free, brass, pre-mixing unit is a thermostatic mixing valve that allows easy adjustment of hot and cold water by connecting directly to the angle valves under the basin. Includes a hot water stop function to prevent scalding. Includes built-in filters to prevent dirt entering the system. Includes back check valves to prevent hot water entering the cold water inlet.		<div></div>														
Application: This product should be fixed firmly to one of the under basin angle valves allowing for no movement, with a flexible hose connecting the second angle valve. Set fixed temperature by manually rotating the thermostatic cap. Option of limiting the maximum temperature to prevent scalding. Hot water stop feature to cut water flow when water gets too hot. Connection kit available upon request.		PRODUCT AT A GLANCE														
Use: Easy, cost-effective solution that allows delivery of hot water at safe temperatures. Prevents the risk of scalding while connected to the water inlet. Delivers water at a maximum temperature aiding in the prevention of the growth of the Legionella bacteria in the water heater.		<table><tr><td>Installation</td><td>Below deck</td></tr><tr><td>Water Supply</td><td>Hot and cold water</td></tr><tr><td>Temperature Range</td><td>15-70°C / 59-158°F</td></tr><tr><td>Pre-set Temperature</td><td>38°C / 100°F</td></tr><tr><td>Max. Approval of "STERN" Thermostatic Mixing Valve (General Acceptance No. C20210993)

Your letters ref. HX/W/2192/21 and HX/W/2567/21 dated 24 June 2021 and 26 July 2021 respectively refer.

Having considered the test report ref. J26590r1 issued on 19 July 2021 by Nutek Systems (HK) Limited, this Authority accepts that the fitting described below complies with, and its use when correctly installed does not contravene, the Waterworks Ordinance and Regulations.

Name of Manufacturer: Y Stern Engineering (1989) Ltd

Country of Origin: Israel

Brand: Stern

Details of Fitting: 3/8" Thermostatic mixing valve

Model: 07200069

Body Markings: 

Expiry Date: 3 June 2026

This Authority hereby permits the use of the above fitting in fresh water plumbing systems subject to full adherence to Waterworks installation requirements. In particular, you are required to draw your customers' attention to the following requirement-

"The cold water supply to the fitting shall be drawn from the same source that supplies the hot water apparatus so as to provide a balanced pressure and to obviate the risk of scalding in the event of a restriction or failure in the water supply."

A condition of this acceptance is that the fitting to be installed shall be replicas of the sample as certified by the testing agent mentioned above and without modifications. This acceptance may be withdrawn at any time if the standard of the fitting installed fail to meet that of the approved sample or if the fitting is found to be unsuitable for use in fresh water plumbing systems.

This acceptance is only applicable to the main body of the fitting, unless otherwise specified.

For the use of the fitting in any project, the General Acceptance Number of this letter must be quoted as a means of identification of acceptance of the fitting by this Authority.

Should you have any enquiries, please contact our Engineer Mr. Terry KUNG at tel. no. 3583 4086.

Yours faithfully,

(Roger WONG)
for Director of Water Supplies
