

## New Retrofit Solution!

Bobrick's **B-8281** Automatic Top-Fill Foam Soap Dispenser specifically designed to fit into existing 1" diameter counter holes.

### HYGIENIC

#### IDEAL UPGRADE FOR TOUCHLESS SOAP DISPENSING.

Upgrade from manual soap dispensers to a reliable, automatic, top-fill, bulk foam soap dispenser with unrivaled foam quality. Best suited for office buildings as well as hospitality, retail, entertainment venues, and universities.

### DESIGN

#### 1" DIAMETER STEM FOR RETROFIT.

No need to drill into the counter to expand an existing 1" hole. The new **B-8281** design has a 1" diameter stem for easy retrofit into a 1" counter hole, significantly reducing installation cost and time. Polished chrome finish reflects design continuity with other restroom accessories and plumbing fixtures.

### LABOR SAVINGS

#### TOP-FILLING FOR EASY MAINTENANCE.

Locking cover swivels open and out of the way with a standard Bobrick key revealing a 2" wide integrated funnel designed for easy filling with bulk jug soap. No more costly, awkward under-counter servicing of screw-on cartridges or empty soap vessels.

### SOAP SAVINGS

#### USES BULK SOAP FOR SIGNIFICANT COST SAVINGS.

Proprietary soap dispensers with cartridges refilled below the counter only fit the manufacturer's dispenser at locked-in prices. For soap savings of 80% and more, switch to the **B-8281** automatic, top-fill, bulk foam soap dispenser.
